

# Revisiting dispersed population in France

Population living out of a continuous settlement (200m) of at least 150 inhabitants

#30DayMapChallenge 2023 Day 21 – raster

geoffrey.caruso@uni.lu with RStats. Data: INSEE, 2016, 200m resolution

Mapping process: terra::rast() of population coordinates, for each 'Departement' crop & compute contiguous population nuclei ('noyaux d'habitat') using terra::patches(), aggregate per population classes, overlay spatRaster and sf polygons (ggplot2) using classInt for discretization.
